**1963-64 TIRE PRESSURE DECAL**

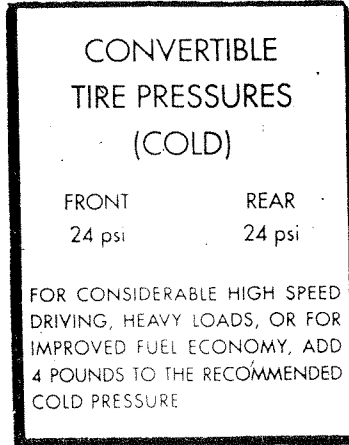

All Models and Body Styles

The Tire Pressure Decal, which is supposed to be placed on the inside of the glove box door lid, is probably missing on 95% of all 1963 and 64 full size Fords. For some unknown reason they were not installed at the factory on the majority of the cars. We now have available all three (3) of the Tire Pressure Decals that were used: HARDTOP AND SEDAN, CONVERTIBLE AND STATION WAGON. Pick the one that is correct for your Body Style of car and install it on the inside of the glove box door lid.
